

Community Integration

We believe in integration into the community for consumers to promote health, happiness, and normalization. We encourage this by providing many opportunities for socialization and community outings for every consumer.

MISSION STATEMENT

BETTER LIFE HEALTH CARE INC.'S

Mission is to build sincere relationships with mentally and physically challenged individuals and their families who have expressed a need for assistance in identifying and accessing different services available to them. While many families are aware that services do exist, the processes involved in obtaining these services are very time consuming and often times bring more complications to an already stressful situation. It is the intention of **BETTER LIFE HEALTH CARE INC.** to coordinate either in a partnership capacity with the family, or act as a representative of the family with knowledgeable health professionals and other caring, willing individuals and organizations to bring a more personable and less chaotic approach to linking these families with the services they need. In turn, this approach will significantly reduce the amount of strain placed on the family and will *“open doors.”*

Day Habilitation

At Better Life Health Care Day Habilitation Program we strive to provide excellent care and mental stimulation to each consumer to ensure that their full potential is reached. This is achieved by our exceptional staff working with consumers on their individual training goals and objectives. More advanced skill and computer training is available as well.

Computer Lab

Creativity is encouraged through craft projects and class activities.
